

# F-12V-M

## CONTROL PANEL ENCLOSURE WITH BUILT-IN POWER SUPPLY

### Product Features

- Suitable for access control.
- In-built fuse for auto protection and power switch.
- High performance simple interface power supply.
- Adjustable output voltage range 11~14V.
- Multifunctional access control output contact can directly connect magnetic lock, exit button, card reader, door bell, etc.

### Technical Specifications

| Model                 | F-12V-M                     |
|-----------------------|-----------------------------|
| Input Voltage         | 220~240VAC/50HZ             |
| Output Voltage        | 11~14VDC                    |
| Output Current        | 5A                          |
| Output Power          | 60W                         |
| Delay Control         | 0~10s                       |
| Output Contact        | NO, NC, COM, Push, 12V, GND |
| Operating Temperature | -20°~60°C                   |
| Operating Humidity    | ≤90%                        |
| Dimensions            | 272×228×67(mm)              |
| Weight                | 2.9Kg                       |
